

Vet-Exam^{plus}

DÜRR MEDICAL releases ALL NEW Software

DÜRR MEDICAL proudly announces its ALL NEW Software **Vet-Exam^{plus}** to be released by end of Mai 2011.

The new software comes with a whole bunch of remarkable new features and options the customer has to buy elsewhere or even wouldn't get same functionality at all.

1. Multi-User licence • One imaging software throughout the entire practice

- buy one scanner and get a license, valid throughout the entire practice
- install the software in a local network
- use slim-client installation
- exchange images with remote colleagues even via WAN

2. Stop talking PACS and save thousands • **Vet-Exam^{plus}** does all a VET-practice needs:

- X-ray
- body part-related
- all regular animals

- X-ray
- tooth sheme related
- all regular animals

- Diagnosis
- Measurements
- Annotations

- Video, Photo
- Endo- /Microscopy

- Archiving, X-ray audit
- SMPTE-Display-Test,....

- Multi-User, Multi-Practice
- Multi - Language,....

2. Unlimited connection • **Vet-Exam^{plus}** talks to almost everything

3. Extended report functions

- choose a report template and
- print or save ready designed standard reports, or
- get your individual report template and add value

4. DICOM and other features

- DICOM - Patient-CD **always included**
- X-ray - Audit function **always included**
- DICOM - Send optional
- DICOM - Print optional
- DICOM - Worklist optional

5. Transfer patient data from 3rd party software via „Pat-Bridge“

Use the optional „Pat-Bridge“ tool to transfer patient-related data from 3rd party software into Vet-Exam^{plus}.

(Works for software using windows controls only)

6. Connect the software via WAN between different locations

- Use our smart software concept to easily connect practices via WAN (Wide Area Network)
- Ease your daily conversation with accessing the same data remotely
- Save time and cost on shipping films or printed images/data back and forth
